Areas of Activities

Consultancy and/or education

Offering an Innovation

COSMETIC Factory, the expert cloud software for cosmetics

COSMETIC Factory is a multilingual Cloud software platform developed by experts that digitalises and optimises the entire process, from the creation of a cosmetic product to its international marketing. It enables better collaboration between teams from all departments and a faster launch of your products on international markets.

MANAGE THE ENTIRE LIFE CYCLE OF COSMETIC PRODUCTS

Based on Artificial Intelligence algorithms, COSMETIC Factory provides a common thread throughout the life cycle of a cosmetic product:

Idea > Formulation > Batches > Test > Regulatory Compliance > Toxicology & Safety > SDS Creation & Labels > Mandatory Information & Claims > International Marketing > Cosmeto-Vigilance

DIGITISATION OF PROCESSES

Enable all users involved around the world to collaborate effectively through task management, execution and validation workflows as well as customised dashboards.

COSMETIC Factory improves your productivity by 30% to launch your products more quickly on the international

markets, saving 20% of costs and ensuring safety and regulatory compliance.
